ARUTYUN ENFENDZHYAN

Android Developer – Kotlin, Java, SQL   Vienna – Rot-Weiß-Rot Karte

 arutyunef@gmail.com   +43 664 4204316   23.12.2000   arudev.dev

PROFILE

Android developer with over 3 years of professional experience delivering production apps, including a navigation system used by DPD couriers across Europe. Focused on clean architecture, maintainable code, and reliable performance in Kotlin, Java, and SQL. Fluent in English, Russian, and Armenian; intermediate (B1) German.

WORK EXPERIENCE

Independent Projects   JAN 2025 – OCT 2025

- Developed several independent apps such as Ghosts Art Legacy (art e-commerce site), Andorra Book Club (community reading hub), and Rodmap (relocation platform), covering frontend, backend, and deployment.

Full-Stack Android Developer: Ignitix – Vienna   JUN 2023 – DEC 2024

- Developed and maintained DPD's courier navigation app used by over 500 couriers daily across multiple European countries, integrating offline routing and navigation features into Organic Maps and synchronizing data with DPD's delivery systems
- Led a small team, conducted code reviews, and coordinated stable production releases across multiple products
- Built internal logistics tools that streamlined courier operations

Full-Stack Android Developer: Stylink (formerly Nano) – Vienna   JAN 2022 – DEC 2022

- Developed web, iOS, and Android apps for a platform connecting brands and content creators
- Rebuilt an unstable Android app, improving reliability and reducing codebase size by over 50%
- Handled full-stack features and coordinated closely with design, testing, and management teams

TECH STACK

Android: Kotlin, Java, Room, Retrofit

Backend: Node.js, PHP (Yii2), Spring Boot, Firebase

Database & Tools: PostgreSQL, REST APIs, CI/CD, Git, Docker
